

Brief Introduction of Root Group of Companies

Root Group of companies was established in the year 1998 and started its commercial operation in mid 1999. Within the short period of time, it has built confidence to the customers of renowned brands worldwide. Root Group is a premium denim producer and well known name in the denim industry. It's a vertical unit, which is capable of making denim fabric to garments as its final output. The yarn is being made at our own spinning mill, and denim fabric and garments under Root Apparels Ltd-all are under the same roof & same big name of Root Group of Companies. The entire sister concerns of Root Group are well equipped with most modern laboratories, machineries, equipment and facilities. Total numbers of corporate employees and workers are 4500. The group runs under the proven leadership of Mr. Mohammed Razzakul Hossen Tutul and comprises management body and employees with long experience and proven track record in this sector.

Our Vision

Our vision is to make your clothing a global winner through:

- Excellence in product quality
- Diversification of products through continuous product innovation
- Customer orientation and cost effectiveness
- Creating competitiveness through 24/7 customer support query centre

Our Strengths:

- Short lead time
- Highly skilled manpower
- Diversified Product Portfolio
- High Standards of quality and service
- Own power generation
- State of the art Effluent Treatment Plant to safeguard the environment and WTP

Our Corporate Social Responsibility:

We as a group believe that business is not only about making money. We have social responsibility as well. We give highest emphasis on reducing pollution and to contribute in greener, cleaner and pollution free environment and also engaged in contributing under privileged people for education, sanitation and uniform for school going children.

Own Power Generation

We commissioned our Captive Power Plant with a capacity of 3.5 MW. It uses Gas. The Plant provides uninterrupted power supply to our mill thereby reducing the high cost of power. Gas helps to control the pollution. We are dedicated towards cleaner & pollution free environment

State of the Art Effluent Treatment Plant (ETP)

We are committed to maintaining a clean environment and have thus set up a State of the Art ETP and water treatment plant (WTP)

Employee Benefits
